SUMMARY

Intermediate Frontend dev who likes to create dynamic and efficient code that helps companies reach their goals. I am detail-oriented, and I like to work on teams but also independently. Most importantly, I prioritize efficiency and clear communication at work to keep project expectations up to date with the development process.

SKILLS

- JavaScript and React
- Bootstrap and HTML/CSS
- Ruby on Rails and Haml
- Postgres and MongoDB
- Axios and Ajax
- Debugging and attention to detail
- Jira and Asana
- Figma, Outlook, Word, and PDF
- Communication and teamwork
- Spanish Language (Native Speaker)

EXPERIENCE

Frontend Developer, Line5, LLC, December 2022-Current
Fort Lauderdale, FL

- Developed a responsive app using React, Bootstrap, and JavaScript connected to a Postgres database and Ruby on Rails backend. This is used by clients of car dealerships to purchase extended car warranties.
- Created new pages and new functionalities using Javascript, CSS, Haml, Ruby on Rails, and Postgres.
- Learned how to use docker containers, keep track of my tickets in Jira, prepare design demos on Figma, and generate weekly reports of my development process for my supervisor.

Junior Developer, Job Core, Inc, June 2022-December 2022
Miami, FL

- Created manual front-end tests using Cypress, Jest, React testing library, and Enzyme.
- Made back-end automated test scripts for Django using GitHub actions.
- Created front-end documentation using JSDoc, and created tutorials on our coding/design processes using Notion.
- Developed a page called 'Metrics' that displayed user activity connected to data from our API in real-time with Bootstrap, Chart.js, and React-Date-Picker. For this, I learned to navigate legacy code and deprecated libraries.

Coding Mentor, 4Geeks, December 2021-May 2022
Miami, FL

- Mentored students in subjects like JavaScript, Python, React, GIT, SQLite, and Flask.
- Taught students how to debug their code by analyzing their errors.
- Guided students while still challenging them to think/problem solve.

EDUCATION AND TRAINING

Certificate of Completion - Full Stack Development
4Geeks Academy, December 2021

Created full-stack apps and learned how to use GitHub, Bootstrap, and Restful APIs.
